

MODULIGHTOR - Wall Grazing

Modulightor is proud to introduce precision optics for perfect illumination of your space with the highest quality LED's

LED - Long life, less heat, less energy

14 Watts / ft, 1579 lumens

2700K or 3000K

95 CRI - Color Rendering index

120 Volts no transformer required

30,000 - 40,000 hours of life

Performance Optics Even illumination on surfaces High efficiency

Asymmetric control, allows for even light distribution across a surface

Peak intensity: 1.0 cd/lm

Efficiency: 94 %

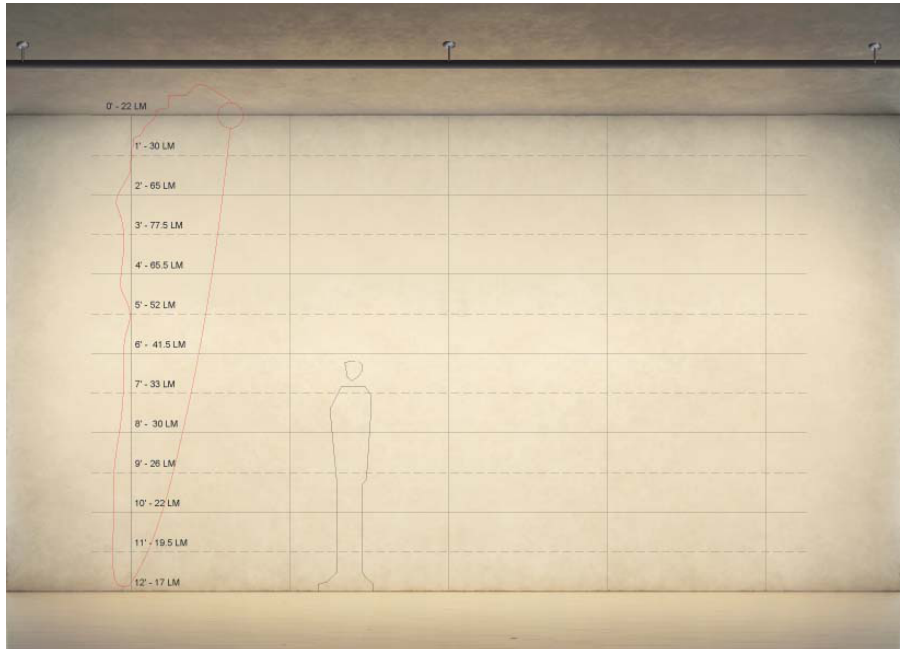

Power and Control Greater options for installations

Our Line voltage LED's do not require a transformer or driver

Low Voltage LED's require a transformer that can be

- Integrated into the fixture
- Built into a dimmer switch
- Remote located

Dimming is accomplished with an ELV dimmer or a remote control. All of the below can be supplied by Modulightor.

Traditional Optics

Wall Grazing Optics
